

Workshop Codefresh Fundamentals

Devops

- **Nível:**
- **Duração:** 14h

Sobre o curso

Codefresh is a Continuous Integration/Delivery solution that fetches code from your GIT repository and packages/compiles it and deploys to a target environment. In this course, you will learn about Codefresh and the fundamentals on how to use it to implement pipelines and faster deployment.

Esta formação é ministrada em Inglês.

Em parceria com a entidade acreditada:
