Sobre o curso

The purpose of the CSCU training program is to provide students with the necessary knowledge and skills to protect their information assets. This class will immerse students into an interactive environment where they will acquire fundamental understanding of various computer and network security threats such as identity theft, credit card fraud, online banking phishing scams, virus and backdoors, emails hoaxes, sex offenders lurking online, loss of confidential information, hacking attacks and social engineering. More importantly, the skills learnt from the class helps students take the necessary steps to mitigate their security exposure.

Students will be prepared for EC-Council's CSCU exam 112-12

This certification is an excellent complement to educational offerings in the domain of security and networking. Educational institutions can provide greater value to students by providing them not only with one of the most updated courseware available today but with a certification that empower their students in the corporate world. The courseware comes complete with labs and exercises to allow the student to gain actual skills.
