

## VMware NSX: Design [V4.x]

VMWare

- **Nível:** Avançado
  - **Duração:** 40h
- 

### Sobre o curso

**This five-day course provides comprehensive training on considerations and practices to design a VMware NSX® environment as part of a software-defined data center strategy.**

This course prepares the student with the skills to lead the design of an NSX environment, including design principles, processes, and frameworks. The student gains a deeper understanding of the NSX architecture and how it can be used to create solutions to address the customer's business needs.
