It also aims to assist participants in their preparation for the PRINCE2® Foundation examination.

This course is aligned with the 7th Edition syllabus by PeopleCert, with continued focus on the traditional challenges of project management, and awareness for today's environment in which projects are conducted, with a people-centric approach and new project management approaches (Change Management Approach, Commercial Management Approach, Sustainability Management Approach and Data Management Approach).

The course delves into the PRINCE2® framework, its practical application in real-world projects and the Foundation Exam.

PRINCE2® has solidified its position as the foremost approach to project management. It is versatile and can be adapted to various project types, emphasizing tailoring and business alignment.
